

SATHEES KUMAR KANDASAMY, PMP

SENIOR PROJECT / PROGRAM MANAGER

Chennai, India | Phone: +91 9840845238 | Email: satheeskumar.pmp@gmail.com | | LinkedIn

PROFESSIONAL SUMMARY

Senior Project / Program Manager with 20+ years of IT experience, including 12+ years in **SAP/ERP** project delivery and enterprise transformation, leading SAP S/4HANA implementations, SAP ECC transformations and ERP modernization across B2B eCommerce, Retail, Manufacturing, Healthcare, Supply Chain Management and FMCG. Experienced in managing end-to-end project lifecycles from initiation, planning and requirements through solution design, integration, testing, data migration, cutover, Go-Live and hypercare.

Strong expertise in **SAP** program governance, stakeholder management, scope, schedule, budget, resource planning, risk and dependency management, vendor coordination, PMO reporting, quality assurance and executive communication. Experienced in SAP Activate, Waterfall and Agile delivery models, coordinating cross-functional business, SAP functional, technical, integration, data, security and testing teams to deliver business-aligned transformation outcomes.

STRATEGY | INNOVATION | LEADERSHIP

SAP PROGRAM MANAGEMENT CORE SKILLS

Area	Skills
SAP Delivery	SAP S/4HANA Implementation • ECC-to-S/4HANA Transformation • SAP B2B E-Commerce • SAP Retail
Methodology	SAP Activate • Waterfall • Agile Delivery • Fit-to-Standard • ITIL
Governance	Project Charter • WBS • Integrated Master Schedule • RACI • RAID • PMO • Steering Committee
Scope & Change	Scope Baseline • Requirements Governance • Change Requests • Impact Analysis • Change Control
Schedule & Cost	Milestones • Critical Path • Schedule Control • Budget • Forecasting • Variance Management
Risk & Issues	Risk Identification • Mitigation • Issue Escalation • Dependencies • Recovery Planning
Stakeholders	Sponsors • Business Process Owners • SAP Leads • Vendors • Global/Offshore Teams
Quality & Testing	SIT • Integration • Regression • UAT • Defect Governance • Go-Live Readiness
Deployment	Cutover • Data Migration Coordination • Go/No-Go • Go-Live • Hypercare
Resources	Capacity • Skills • Onshore/Offshore Coordination • Vendor Management
Tools	Microsoft Project • Smartsheet • Jira • ServiceNow

ACCOMPLISHMENTS

- Managed end-to-end project lifecycle for a global SAP S/4HANA greenfield implementation across 4 regional entities, delivering 100% on schedule and 8% under a $10M budget.
- Spearheaded the successful rollout of 5 core SAP modules (FI, MM, SD, PP, HR) for 2000+ global users, reducing operational inefficiencies by 30%.
- Directed a complex brownfield migration from SAP ECC 6.0 to S/4HANA, cutting data migration error rates by 45% and achieving zero critical-path delays during cutover.
- Collaborated with finance and steering committees to optimize resource allocation, achieving a 15% direct cost reduction through vendor and system-integrator restructuring.

- Enforced strict project governance and scope management, reducing project overruns and change-request creep by 25% across a portfolio of 10+ concurrent initiatives.
- Directed post-go-live hypercare support for high-priority ticket resolution, reducing critical system incident response times by 50% within the first quarter.

SAP ENGAGEMENT PORTFOLIO

1. B2B eCommerce Transformation – SAP S/4HANA | Manufacturing | Greenfield

Scope: SAP Commerce Cloud, SAP S/4HANA, SAP BTP, SAP Integration Suite and Product content management system. Business processes: Business Partner, Product & Catalog, Pricing, Order-to-Cash, Inventory, Delivery, Billing and FI-AR.

- Owned overall program strategy, delivery roadmap and governance, aligning business objectives, technology transformation priorities, scope, milestones, budget, resource capacity and expected business outcomes.
- Directed multiple interconnected workstreams covering SAP Commerce Cloud, S/4HANA, BTP, enterprise integration, data migration, security, testing, infrastructure and business process transformation.
- Established program governance through steering committees, executive reviews, integrated master plans, WBS, RACI, RAID management, financial tracking, dependency management and milestone-based reporting.
- Partnered with business leaders and SAP solution teams to drive requirements prioritization, Fit-to-Standard decisions, target solution alignment and cross-platform integration across customer, product, pricing, orders, inventory, delivery and billing.
- Managed program-level risks, critical dependencies, scope changes, vendor commitments and resource constraints, driving timely decisions and escalations across business and technology stakeholders.
- Governed integrated testing, business readiness, release planning, cutover strategy, Go/No-Go decisions, Go-Live and hypercare, ensuring coordinated delivery across all participating workstreams.

---

2. Enterprise ERP Transformation – SAP ECC to S/4HANA | Retail | Brownfield

Scope: SAP ECC-to-S/4HANA transformation covering FI/AR, FI/CO, SD, MM, retail sales, inventory, procurement, logistics, integration, data migration, security and reporting.

- Led the overall ERP transformation program, defining the delivery roadmap, transformation objectives, governance structure, scope boundaries, implementation strategy and executive stakeholder engagement.
- Managed integrated workstreams across SAP functional teams, infrastructure, custom-code remediation, data migration, integration, security, reporting, testing and organizational change management.
- Established program controls for schedule, budget, resource utilization, RAID, cross-functional dependencies, change management, quality gates and executive steering committee reviews.
- Governed business process transformation and Fit-to-Standard/Fit-to-Gap workshops, coordinating decisions on enterprise processes, custom-code remediation, system readiness and target architecture with functional and solution architecture leads.
- Directed data migration and integration governance across finance, sales, procurement, inventory and logistics, overseeing data cleansing, mock conversions, reconciliation, migration readiness and business sign-offs.
- Oversaw integrated testing, regression, UAT, deployment readiness, cutover rehearsals, business continuity planning, Go/No-Go governance, Go-Live and post-implementation stabilization.

---

3. SAP S/4HANA Selective Data Transition (Bluefield) – Manufacturing & Supply Chain Transformation

Scope: Consolidation of multiple legacy ERP landscapes into SAP S/4HANA through selective migration of business data, organizational structures and active transactions; harmonization of business processes; integration modernization; and phased decommissioning of redundant legacy applications.

- Led end-to-end Bluefield transformation planning and governance, managing scope, schedule, budget, resources, WBS, RACI, RAID, dependencies and executive stakeholder communication.
- Coordinated SAP functional, technical, infrastructure, data migration, security, integration, testing and business workstreams across source and target ERP landscapes.

- Governed module-wise transition decisions, classifying processes and applications into Migrate, Retain, Redesign and Retire categories based on business requirements and target architecture.
- Managed migration planning for FI/CO, MM, SD, PP, QM and WM, including active master data, open transactions, selected historical data, data mapping and reconciliation.
- Managed phased migration waves, mock conversions, SIT, regression, UAT, data validation, business sign-offs and cutover readiness.
- Led Go-Live governance, command-centre operations, hypercare, legacy decommissioning coordination and transition to Run Service.

---

4. Enterprise Application Integration Program – SAP S/4HANA & PeopleSoft Finance/HR

Scope: SAP S/4HANA, FI/CO, PeopleSoft Finance and HR, enterprise APIs/interfaces, master data synchronization, organizational data, financial transactions and security.

- Directed the enterprise integration program roadmap, aligning SAP and PeopleSoft transformation priorities with Finance, HR and organizational business objectives.
- Established cross-platform program governance, integrated delivery plans, milestones, resource models, financial tracking, RAID, communications and steering committee reporting across SAP, PeopleSoft and integration teams.
- Led stakeholder alignment across Finance, HR, enterprise architecture, SAP functional, technical, security, data and vendor teams to manage scope, priorities, delivery dependencies and design decisions.
- Governed integration strategy and delivery across employee/HR information, organizational structures, financial master data and financial transactions, including interface specifications, data mapping, transformation, synchronization and validation.
- Managed program-level integration risks, data ownership, reconciliation requirements, security dependencies, environment readiness and cross-system release coordination.
- Directed end-to-end integration assurance covering SIT, UAT, financial reconciliation, defect management, business acceptance, cutover, Go-Live and stabilization.
- Established executive reporting and escalation mechanisms to provide visibility into delivery progress, integration readiness, key risks, resource constraints and business-impacting dependencies.

---

5. SAP Application Support & Managed Services – AMS

Scope: SAP S/4HANA, SD, MM, FI/CO, SAP integrations and ITIL-based Incident, Problem, Change and Service Request Management.

- Managed SAP application support operations, overseeing incidents, service requests, problems and changes in line with ITIL processes, SLAs, OLAs and business priorities.
- Established AMS governance covering service KPIs, SLA performance, service reviews, escalations, root cause analysis, capacity planning, resource management and executive reporting.
- Coordinated L1/L2/L3 support teams and SAP functional, technical and integration specialists, ensuring clear ownership, prioritization and timely resolution.
- Led Problem and Change Management, release coordination, CAB governance, deployment readiness, service transition and production stability.

---

6. SAP S/4HANA & EHR Integration – Healthcare | Global Rollout

Scope: SAP S/4HANA–EHR integration, healthcare and financial data exchange, billing, master data mapping, interfaces, validation, security and regional deployment. Patient/encounter data included only where applicable to the approved integration scope.

- Led global rollout planning and governance across regional healthcare operations, SAP S/4HANA, EHR integration teams and vendors, managing scope, schedule, resources, risks and milestones.
- Coordinated regional requirements, localization, business process standardization and integration dependencies across healthcare and enterprise teams.
- Governed interface/API delivery, data mapping, validation, reconciliation, SIT/UAT, defect resolution and security validation.
- Managed rollout waves, cutover rehearsals, Go/No-Go governance, regional sign-offs, Go-Live, hypercare and transition to Run Service.

AI-ENABLED SAP INITIATIVES

- **SAP FI/CO:** Developed AI-driven financial anomaly detection, fraud detection, cash-flow forecasting, and predictive financial analytics to strengthen financial controls and improve decision-making.
- **SAP FI/AR:** Developed AI use-case proposals for invoice automation, customer payment prediction, collections prioritization, and accounts-receivable anomaly detection to improve cash collection and reduce DSO.
- **SAP SD:** Developed AI solutions for sales forecasting, pricing optimization, customer/order anomaly detection, and intelligent sales analytics to improve revenue planning and commercial decision-making.
- **SAP EWM:** Developed AI solution proposals for warehouse demand forecasting, intelligent slotting, picking-route optimization, and inventory movement prediction to improve warehouse productivity and operational efficiency.

PROGRAM GOVERNANCE & LEADERSHIP

- Steering committee leadership and executive status communication.
- Weekly PMO governance covering scope, schedule, cost, risks, issues, dependencies and decisions.
- Integrated RAID management with clear owners, mitigation actions, target dates and escalation paths.
- Change control governance with impact assessment across scope, schedule, cost, resources, quality and readiness.
- Cross-functional coordination across SAP functional, technical, integration, data, testing and security teams.
- Onshore/offshore and vendor coordination using RACI, clear handoffs and escalation mechanisms.
- Go-live governance using readiness criteria, cutover checkpoints, business sign-off and Go/No-Go decision management.

SAP PROGRAM MANAGEMENT KPIs

Dimension	KPIs
Delivery	Milestone achievement • Schedule variance • Critical path status
Scope	Approved scope • Open change requests • Requirements completion
Financial	Budget vs actual • Forecast • Cost variance
Quality	Test pass rate • Critical defects • Defect aging
Data	Migration completion • Reconciliation • Data quality
Integration	Interface readiness • Test pass rate • Critical integration defects
Resources	Capacity • Utilization • Critical skill coverage
Business Readiness	UAT completion • Training completion • Business sign-off
Go-Live	Cutover readiness • Open critical issues • Hypercare incident trend

---

PROFESSIONAL EXPERIENCE

Organization	Role	Period
Infinite	Senior Project / Program Manager	Jun 2024 – Jul 2026
Aspire Systems	Senior Project Manager	Mar 2022 – Mar 2024
Unilog	Project Manager	Dec 2020 – Mar 2022
Infosys	Project Manager	Jun 2013 – Jan 2020
Photon Infotech	Project Manager	Nov 2011 – Mar 2013
Exelacom Technologies	Senior Project Lead	Jul 2010 – Nov 2011
Polaris	Senior Project Lead	Mar 2004 – Jul 2010
Synova Innovative Solutions	Software Developer	Dec 2003 – Mar 2004

CERTIFICATIONS

- Project Management Professional (PMP)
- AgilePgM (Agile Programme Management)
- ITIL Foundation
- Certified ScrumMaster (CSM)
- SAFe Agilist
- Lean Six Sigma (Yellow belt)
- SAP Technology Consultant

EDUCATION

- M.S (Software Systems) — Bharathiar University – May 2003
- B.E (EEE) — Bharathiar University – May 1999
