

SATHEES KUMAR KANDASAMY, PMP

PROJECT | PROGRAM | DELIVERY | DIGITAL TRANSFORMATION LEAD

Chennai, India | Phone: +91 9840845238 | Email: satheeskumar.pmp@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Dedicated Senior Project / Program / Delivery Manager with over 20+ years of experience in leading cross-functional teams, strong technical background, and a proven track record of driving successful project deliveries.

PORTFOLIO

STRATEGY | INNOVATION | LEADERSHIP

Scan my full program history, domain expertise, and technical delivery capabilities at sathees.github.io/portfolio

TECHNICAL COMPETENCIES

- **API / Integration & Microservices:** REST APIs, SOAP, API Management, Microservices, Event-Driven Architecture, Integration Platforms, Distributed Systems
- **DevOps / Platform Engineering:** CI/CD, Git, Jenkins, Maven, Docker, Kubernetes, DevSecOps, Release Automation, SRE, Observability
- **Cybersecurity & Risk:** Cybersecurity, IAM, Secure SDLC, Data Security, Vulnerability Management, Risk Management, Compliance, Security Controls
- **SAP / ERP Technology:** SAP S/4HANA, ECC-to-S/4HANA, Greenfield/Brownfield, RISE with SAP, SAP BTP, SAP Commerce, SAP Integration Suite, MM, SD, FI, WM
- **Digital Engineering & Modernization:** Enterprise Modernization, Legacy Transformation, API Modernization, Microservices, SOA, Cloud Adoption, Scalability
- **Data & Analytics:** Data Engineering, ETL/ELT, Data Lakes, Snowflake, Databricks, Spark, AWS Glue, Python, SQL, Power BI
- **Cloud & Infrastructure:** AWS, Azure, GCP, Cloud Migration, Cloud-Native Architecture, Docker, Kubernetes, Disaster Recovery, FinOps
- **Java Full-Stack Engineering:** Java, Spring Boot, Spring MVC, REST APIs, Microservices, Hibernate/JPA, SQL/NoSQL, Angular, React, JavaScript, HTML5, CSS3, Maven, Git, Jenkins, Docker, Kubernetes, CI/CD and Cloud Deployment.
- **Healthcare Technology:** PACS, DICOM, HL7, FHIR, EHR/EMR Integration, RIS/LIS Integration, Healthcare APIs, Clinical Data Exchange, Healthcare Data Migration, Interoperability, Healthcare Application Modernization, Cloud Healthcare Platforms, Security and High Availability.
- **AI / GenAI & Machine Learning:** Generative AI, AI/ML, Predictive Analytics, AI Use Cases, AI Governance, MLOps, Machine Learning.

DOMAIN COMPETENCIES

- **Healthcare IT:** PACS & Healthcare Data Migration, EHR/EMR, Payer/Provider Platforms, Care Management, Population Health, Case & Device Management, Medication Management, HL7/FHIR and Healthcare Integrations
- **BFSI:** Core Banking, AML, SWIFT, Payments, Investment Services, Risk Management, Account Monitoring, Invoicing, Insurance Applications, Claims & Policy Management, and Financial Integrations.
- **FinTech / Digital Payments:** Digital Payments, UPI, Digital Wallets, eKYC, Open Banking, Payment Gateway Integration, API & Microservices Modernization, Fraud Detection and Financial Analytics.
- **SAP / ERP:** SAP S/4HANA Greenfield & Brownfield Implementations, ECC-to-S/4HANA Transformation, S/4HANA Migration, RISE with SAP, SAP BTP, SAP Commerce and MM/SD/FI-AR/FI-CO/WM/MM. multi-ERP customer environment (Coupa, Concur, PeopleSoft, Workday, Salesforce), Managing SAP rollout projects, Manage efficient use of ServiceNow for support projects.
- **B2B eCommerce / Digital Commerce:** SAP-Integrated B2B eCommerce, Digital Commerce Transformation, Monolith-to-Microservices Modernization, API Modernization, Cloud Adoption, Product Catalog, Order Management and Product Rollouts
- **Managed Services / MSP:** IT Service Management (ITSM), IT Operations Management (ITOM), Service Desk, Incident & Problem Management, Change & Release Management, SLA/OLA Management, Infrastructure Monitoring, ServiceNow, Disaster Recovery, Backup & Recovery, Security Operations, Capacity & Performance Management, and 24x7 Managed Services.
- **AI / Data Science:** AI/ML Programs, Predictive Analytics, Fraud Detection, Loan Risk Prediction, Healthcare Predictive Analytics, Data Engineering, ETL and Machine Learning Model Development using Python, XGBoost, AWS Glue, Spark, Databricks and Snowflake.

CAREER ACHIEVEMENTS

- Reduced project operating costs by 18% across four workstreams through vendor SLA renegotiation and SaaS consolidation.
- Managed a \$4.2M global portfolio budget with <1.5% variance, delivering milestones on or below budget.
- Accelerated product delivery cycles by 35% by transitioning an 18-member team from Waterfall to Agile Scrum.
- Recovered a delayed enterprise rollout, delivering one week ahead of deadline and avoiding \$80K in potential penalties.
- Improved sprint velocity by 25% through Jira workflow optimization and process automation.
- Maintained 94% on-time delivery across 12 concurrent client-facing projects over two years.
- Improved CSAT from 78% to 94% through automated milestone reporting and transparent stakeholder governance.
- Secured \$1.5M recurring revenue following successful MVP delivery and subsequent multi-year client partnership.
- Reduced project scope-creep incidents by 30% YoY through an enterprise risk-mitigation framework.
- Led a 14-stakeholder data migration with zero system downtime across Engineering, Product and Legal.

PROGRAM DELIVERY & GOVERNANCE

- Lead Agile delivery using Scrum and SAgE, including PI Planning, product backlog management, backlog refinement, sprint planning, demos, retrospectives and release planning.
- Define release schedules, sprint cadence, scope boundaries, dependencies, acceptance criteria and Definition of Ready/Definition of Done.
- Manage scope creep through impact assessment, prioritization, change control, stakeholder alignment and transparent trade-off decisions.
- Use Agile dashboards and metrics such as velocity, burn-up/burn-down, throughput, cycle time, defects, release predictability and dependency status.

- Identify underperformance during sprints, establish corrective actions, rebalance work and resources, and communicate progress and risks to clients and stakeholders.
- Drive continuous demos and incremental validation to reduce late surprises and improve business confidence.

COMMERCIALS, PROPOSALS & CLIENT MANAGEMENT

- Contribute to SOW creation, RFP responses, solution proposals, estimation, staffing models, delivery assumptions, dependencies, risks and commercials.
- Manage T&M and Fixed Bid delivery models with focus on scope, effort, revenue, margin, utilization, forecast and profitability.
- Lead client negotiations, expectation management, conflict resolution, escalations and executive communications.
- Identify scope and delivery risks early; maintain transparent governance to avoid last-minute surprises.
- Support account growth through relationship management, opportunity identification, account mining, pre-sales support and expansion of existing engagements.
- Balance customer outcomes, delivery commitments and commercial objectives while maintaining strong client satisfaction.

PROJECT & PROGRAM MANAGEMENT

- Own end-to-end delivery from backlog identification and estimation through development, testing, release, production implementation and hypercare.
- Establish delivery governance covering milestones, RAID, dependencies, quality, financials, resources, risks, issues, decisions and executive reporting.
- Manage complex multi-team and multi-million-dollar programs with distributed/onshore-offshore delivery models.
- Track project milestones, deadlines and deliverables; identify deviations early and drive recovery plans.
- Identify, track and manage inter-team and cross-functional dependencies across engineering, architecture, infrastructure, security, data, business and vendors.
- Provide regular progress reports, risk assessments, forecasts and executive updates to clients, stakeholders and CXO leadership.
- Define and monitor software development processes for Scrum teams, including estimation, planning, delivery controls, quality gates and release readiness.
- Drive quality frameworks, operational readiness, ITIL-aligned service practices and continuous improvement initiatives.
- Lead escalations using structured problem solving, root-cause analysis, action ownership and executive communication.

PEOPLE & RESOURCE MANAGEMENT

- Lead and mentor project/program managers, architects, developers, QA engineers, DevOps engineers and cross-functional teams.
- Motivate teams through clear objectives, ownership, recognition, coaching, transparent communication and career development.
- Conduct structured 1:1s, monthly/quarterly reviews, performance discussions and development planning.
- Manage performance issues—including situations involving previously high-performing team members—using objective evidence, coaching, measurable goals and appropriate escalation.
- Support hiring through role definition, technical/behavioral interviews, candidate evaluation, onboarding and workforce planning.
- Optimize resource planning using skills, capacity, utilization, project priority, delivery timelines and future demand.

PROFESSIONAL EXPERIENCE

- **Infinite** — Senior Project / Program Manager | Chennai | Jun 2024 – Jul 2026
- **Aspire Systems** — Senior Project Manager | Chennai | Mar 2022 – Mar 2024
- **Unilog** — Technical Project Manager | Chennai | Dec 2020 – Mar 2022
- **Infosys** — Project Manager | June 2013 - January 2020 | Chennai
- **Photon Infotech** — Project Manager | Chennai | Nov 2011 – Mar 2013
- **Exelacom Technologies** — Sr. Project Lead | Chennai | Jul 2010 – Nov 2011
- **Polaris** — Sr. Project Lead | Chennai | Mar 2004 – Jul 2010
- **Synova Innovative Solutions** — Software Developer | Bangalore | Dec 2003 – Mar 2004

CERTIFICATIONS

- ❖ Project Management Professional (PMP)
- ❖ ITIL Foundation
- ❖ Certified ScrumMaster (CSM)
- ❖ Cloud Architect
- ❖ Certified Scrum Product Owner (CSPO)
- ❖ SAgile Agilist
- ❖ Certified Enterprise Architect Professional (CEAP)
- ❖ AgilePgM (Agile Programme Management)
- ❖ Lean Six Sigma (Yellow belt)
- ❖ Digital Finance & FinTech Ecosystem Professional
- ❖ SAP Technology Consultant
- ❖ Data Science & AI Project Management: Plan, Track, Deliver

EDUCATION

M.S (Software Systems) — Bharathiar University – May 2003

B.E (EEE) — Bharathiar University – May 1999
