

SATHEES KUMAR KANDASAMY, PMP

SENIOR PROJECT / PROGRAM MANAGER

Chennai, India | Phone: +91 9840845238 | Email: satheeskumar.pmp@gmail.com | | LinkedIn

PROFESSIONAL SUMMARY

Senior Project / Program Manager with 20+ years of IT experience, including 10+ years in **SAP/ERP** project delivery and enterprise transformation, leading SAP S/4HANA implementations, SAP ECC transformations and ERP modernization across B2B eCommerce, Retail, Manufacturing, Healthcare, Supply Chain Management and FMCG. Experienced in managing end-to-end project lifecycles from initiation, planning and requirements through solution design, integration, testing, data migration, cutover, Go-Live and hypercare.

Strong expertise in **SAP** program governance, stakeholder management, scope, schedule, budget, resource planning, risk and dependency management, vendor coordination, PMO reporting, quality assurance and executive communication. Experienced in SAP Activate, Waterfall and Agile delivery models, coordinating cross-functional business, SAP functional, technical, integration, data, security and testing teams to deliver business-aligned transformation outcomes.

STRATEGY | INNOVATION | LEADERSHIP

SAP PROGRAM MANAGEMENT CORE SKILLS

Area	Skills
SAP Delivery	SAP S/4HANA Implementation • ECC-to-S/4HANA Transformation • SAP B2B E-Commerce • SAP Retail
Methodology	SAP Activate • Waterfall • Agile Delivery • Fit-to-Standard • ITIL
Governance	Project Charter • WBS • Integrated Master Schedule • RACI • RAID • PMO • Steering Committee
Scope & Change	Scope Baseline • Requirements Governance • Change Requests • Impact Analysis • Change Control
Schedule & Cost	Milestones • Critical Path • Schedule Control • Budget • Forecasting • Variance Management
Risk & Issues	Risk Identification • Mitigation • Issue Escalation • Dependencies • Recovery Planning
Stakeholders	Sponsors • Business Process Owners • SAP Leads • Vendors • Global/Offshore Teams
Quality & Testing	SIT • Integration • Regression • UAT • Defect Governance • Go-Live Readiness
Deployment	Cutover • Data Migration Coordination • Go/No-Go • Go-Live • Hypercare
Resources	Capacity • Skills • Onshore/Offshore Coordination • Vendor Management
Tools	Microsoft Project • Smartsheet • Jira • ServiceNow

ACCOMPLISHMENTS

- Managed end-to-end project lifecycle for a global SAP S/4HANA greenfield implementation across 4 regional entities, delivering 100% on schedule and 8% under a $10M budget.
- Spearheaded the successful rollout of 5 core SAP modules (FI, MM, SD, PP, HR) for 2000+ global users, reducing operational inefficiencies by 30%.
- Directed a complex brownfield migration from SAP ECC 6.0 to S/4HANA, cutting data migration error rates by 45% and achieving zero critical-path delays during cutover.
- Collaborated with finance and steering committees to optimize resource allocation, achieving a 15% direct cost reduction through vendor and system-integrator restructuring.
- Enforced strict project governance and scope management, reducing project overruns and change-request creep by 25% across a portfolio of 10+ concurrent initiatives.

- Directed post-go-live hypercare support for high-priority ticket resolution, reducing critical system incident response times by 50% within the first quarter.

SAP IMPLEMENTATION EXPERIENCE

1. SAP B2B E-COMMERCE - Reed manufacturing

Project	Details
Objective	Modernize B2B customer commerce and integrate digital ordering with SAP enterprise processes.
SAP Landscape	SAP Commerce Cloud • SAP S/4HANA • SAP BTP • SAP Integration Suite • Greenfield-oriented delivery • External/Legacy Systems
Processes	Customer/Business Partner • Product/Catalog • Pricing • Order-to-Cash • Inventory • Delivery • Billing • FI-AR

Key Responsibilities:

- Owned **Program planning and governance**, managing scope, schedule, budget, resources, RAID, dependencies, WBS, RACI and executive reporting.
- Coordinated **business, SAP functional, technical, BTP, integration, data, security, testing and vendor workstreams**, ensuring cross-functional alignment.
- Managed **requirements, Fit-to-Standard discussions, solution decisions and scope control**, including SAP Commerce Cloud–S/4HANA integration for customer, product, pricing, orders, inventory and billing.
- Led **SIT, E2E testing, UAT, DevOps/CI-CD releases, defect governance, readiness reviews and business sign-off**.
- Directed **cutover, rehearsal, Go/No-Go governance, Go-Live and hypercare**, while managing stakeholder communication, escalations and business readiness.

---

2. ECC-TO-S/4HANA TRANSFORMATION – RETAIL INDUSTRY - McGuckin Hardware

Project	Details
Objective	Transform an existing SAP ECC landscape to SAP S/4HANA while improving process standardization, integration, data visibility and operational efficiency.
Approach	SAP Activate • Transformation/Brownfield-oriented delivery • Fit-to-Standard / Fit-to-Gap • Controlled cutover
SAP Scope	S/4HANA • FI/CO • SD • MM • Retail sales/inventory processes • Integration • Data Migration • Security • Reporting

Key Responsibilities:

- Led the **ECC-to-S/4HANA transformation** roadmap and governance, managing scope, milestones, WBS, resources, budget, RAID and stakeholder alignment.
- Coordinated S/4HANA readiness assessment and **Fit-to-Standard/Fit-to-Gap workshops**, including custom-code assessment, remediation and cross-functional workstreams.
- Directed **data migration and integration readiness**, covering data cleansing, mock migration, validation, reconciliation and integration across sales, procurement, inventory, finance, logistics and external systems.
- Managed **SIT, E2E, regression testing, UAT** and DevOps/CI-CD release activities, including defect governance, readiness assessment and business sign-off.
- Owned **cutover, migration rehearsals, Go/No-Go governance, Go-Live and hypercare**, driving production stabilization and transition to support.

---

3. SAP ERP INTEGRATION – PEOPLESOFT FINANCE & HR - Johnson Controls

Project	Details
Objective	Integrate SAP S/4HANA with PeopleSoft Finance and PeopleSoft HR to enable seamless enterprise data exchange, process integration and reporting.
Approach	SAP integration architecture • API/Interface-based integration • Data mapping & transformation • Integration testing • Controlled deployment
Scope	S/4HANA • FI/CO • HR Integration • PeopleSoft Finance • PeopleSoft HR • APIs/Interfaces • Data Synchronization • Security

Key Responsibilities:

- Led the SAP–PeopleSoft integration roadmap, aligning **Finance, HR**, SAP functional, technical and business stakeholders on scope, milestones, dependencies and delivery objectives.
- Established integration governance, **WBS, integrated project plan, resource model**, RAID management, communication plan and steering committee cadence across SAP and PeopleSoft teams.
- Coordinated **interface design and development covering employee/HR data**, financial master data, organizational data and financial transactions, including data mapping, transformation and validation.
- Managed **end-to-end integration testing**, including SIT, UAT, interface reconciliation, defect governance, security validation and business sign-off across SAP S/4HANA, PeopleSoft Finance and PeopleSoft HR.
- Owned **deployment and cutover activities**, including integration readiness, mock runs, production deployment, Go/No-Go governance, hypercare and post-Go-Live stabilization.

---

4. SAP IT APPLICATION SUPPORT & MANAGED SERVICES – Marks Supply

Project	Details
Objective	To manage and deliver **stable, SLA-driven SAP S/4HANA application support services** by implementing ITIL-based Incident, Problem, Change and Service Request Management, ensuring high system availability, timely issue resolution, continuous service improvement and strong business stakeholder satisfaction.
Approach	ITIL-based managed services with proactive monitoring, SLA-driven Incident/Problem/Change Management, structured governance, RCA and continuous service improvement to ensure stable SAP operations.
Scope	SAP S/4HANA • SAP SD • SAP MM • SAP FI/CO • SAP Integration • Incident, Problem & Change Management

Key Responsibilities:

- Managed **24×7 SAP application support**, overseeing incidents, service requests, problems and changes in alignment with **ITIL processes, SLAs, OLAs and business priorities**.
- Established **support governance**, including SLA/KPI tracking, service reviews, escalation management, RCA governance, capacity planning, resource management and executive reporting.
- Coordinated **L1/L2/L3 support teams and SAP functional, technical and integration teams**, ensuring timely incident resolution and effective cross-functional collaboration.
- Led **Problem and Change Management**, driving root-cause analysis, corrective actions, release planning, CAB governance, deployment coordination and production stability.
- Managed **service improvement and business stakeholder engagement**, identifying recurring issues, automation opportunities, knowledge-management improvements and continuous service improvement initiatives.

---

5. SAP INTEGRATION WITH ELECTRONIC HEALTH RECORD (EHR) – HEALTHCARE – Pfizer

Project	Details
Objective	Integrate SAP S/4HANA with Electronic Health Record (EHR) systems to enable seamless healthcare data exchange, financial integration, operational visibility and streamlined healthcare business processes.
Scope	End-to-end SAP–EHR integration covering patient and encounter-related data exchange where applicable, healthcare billing, financial accounting, patient services, master data mapping, interface development, data validation, security, testing, deployment and hypercare.
Approach	Followed a structured Discover-to-Optimize approach covering requirements analysis, interface design, SAP BTP Integration Suite / API integration, data mapping, SIT/UAT, reconciliation, cutover, Go-Live and continuous improvement.

Key Responsibilities:

- Led **global rollout planning and governance** across regional healthcare operations, SAP S/4HANA, EHR integration teams and vendors, managing scope, schedule, resources, risks and deployment milestones.
- Coordinated **regional requirements, localization**, business process standardization and integration dependencies to align global solutions with regional healthcare needs.

- Governed **SAP S/4HANA–EHR integration**, including APIs/interfaces, data mapping, validation, reconciliation, SIT/UAT, defect resolution and security validation.
- Managed **rollout waves, cross-functional teams, cutover rehearsals, Go/No-Go decisions**, regional business sign-off and Go-Live readiness to minimize operational disruption.
- Led **hypercare and stabilization**, monitored integration issues, coordinated stakeholder reporting and ensured knowledge transfer, operational readiness and transition to Run Service.

AI-ENABLED SAP INITIATIVES

- **SAP FI/CO:** Developed AI-driven financial anomaly detection, fraud detection, cash-flow forecasting, and predictive financial analytics to strengthen financial controls and improve decision-making.
- **SAP FI/AR:** Developed AI use-case proposals for invoice automation, customer payment prediction, collections prioritization, and accounts-receivable anomaly detection to improve cash collection and reduce DSO.
- **SAP SD:** Developed AI solutions for sales forecasting, pricing optimization, customer/order anomaly detection, and intelligent sales analytics to improve revenue planning and commercial decision-making.
- **SAP EWM:** Developed AI solution proposals for warehouse demand forecasting, intelligent slotting, picking-route optimization, and inventory movement prediction to improve warehouse productivity and operational efficiency.

PROGRAM GOVERNANCE & LEADERSHIP

- Steering committee leadership and executive status communication.
- Weekly PMO governance covering scope, schedule, cost, risks, issues, dependencies and decisions.
- Integrated RAID management with clear owners, mitigation actions, target dates and escalation paths.
- Change control governance with impact assessment across scope, schedule, cost, resources, quality and readiness.
- Cross-functional coordination across SAP functional, technical, integration, data, testing and security teams.
- Onshore/offshore and vendor coordination using RACI, clear handoffs and escalation mechanisms.
- Go-live governance using readiness criteria, cutover checkpoints, business sign-off and Go/No-Go decision management.

SAP PROGRAM MANAGEMENT KPIs

Dimension	KPIs
Delivery	Milestone achievement • Schedule variance • Critical path status
Scope	Approved scope • Open change requests • Requirements completion
Financial	Budget vs actual • Forecast • Cost variance
Quality	Test pass rate • Critical defects • Defect aging
Data	Migration completion • Reconciliation • Data quality
Integration	Interface readiness • Test pass rate • Critical integration defects
Resources	Capacity • Utilization • Critical skill coverage
Business Readiness	UAT completion • Training completion • Business sign-off
Go-Live	Cutover readiness • Open critical issues • Hypercare incident trend
